

Maintenance instruction for MELACO products

Product lines: MELAFOL, MAGIC GLOSS, COMPLETE SKIN, CSL and CSD

1. MELACO products manufactured in full gloss are delivered with polyethylene protective film. The protective film should not be ripped off, tore, cut or removed during processing. Due to the possibility of damaging the surface of gloss film it is not allowed to write on the protective film. The solvents contained in markers can destroy the surface and they may also cause a permanent indentation of varnish. The time of protective film removal depends exclusively on the customer's decision.
2. Mild cleaning agents, such as water or water solution of soap or of mild detergent, can be used for cleaning and maintenance of the products. Prior to the application of a cleaning agent always perform a test on a small, invisible fragment of the surface.
3. In particular it is not allowed to use the agents for scrubbing, agents containing acids, waxes, solvents and other chemically active substances.
4. Use soft clothes (e.g. made of microfiber) for cleaning.
5. It is prohibited to use steam devices for cleaning because heated steam can cause permanent irreparable damages when it penetrates into the surface structure.
6. The products with gloss or supermatt surface are protected with a special protective film, which should be removed only when the assembly of furniture is finished.
7. In case when the surface is soiled or stained, such a soil or stain should be removed immediately, in accordance with point 1. Dried up stains can be irremovable.
8. We recommend a special set ULTRA-GLOSS SUPERPOLISH+DGS for cleaning and maintenance of products with gloss surface. This set contains a maintaining agent, sponge for its application and soft cloth for surface polishing. It is prohibited to use the ULTRA-GLOSS SUPERPOLISH+DGS set for cleaning and maintenance of products with the surface other than full gloss.
9. Before the application of a cleaning agent perform a test on a small, invisible fragment of the surface.
10. Please contact MELACO's Sales Department in case of any questions or comments regarding the COMPLETE SKIN products.
