- ▶ finishing of narrow surface: front edge profiling R65 / rear edge R4, postformed edges
- ▶ layered cardboard packaging

assembly

ELEMENTS MOUNTING

Depending on individual needs, commercially available mounting materials can be used to fix elements between each other or to fix them to the wall.

The set includes a stabilizing material that can be cut to the required size. It also prevents the elements from moving freely and protects the surfaces from scratching each other.

modular furniture

FOR HOME AND OFFICE

about melaco

GET TO KNOW US BETTER

We create furniture components based on wood-based boards for leading furniture companies and design manufacturers. We use materials from a certified supply chain, so all of them are marked with the FSC logo. Our products are famous for their high quality and durability.

Our offer includes furniture elements, furniture front panels, furniture boards, tabletops, strips, panels, profiles, furniture casings and elements in click technology. Melaco products are produced in various dimensions and finishing types based on standard or own, unique technologies.

home office idea

THE SIGN OF OUR TIMES

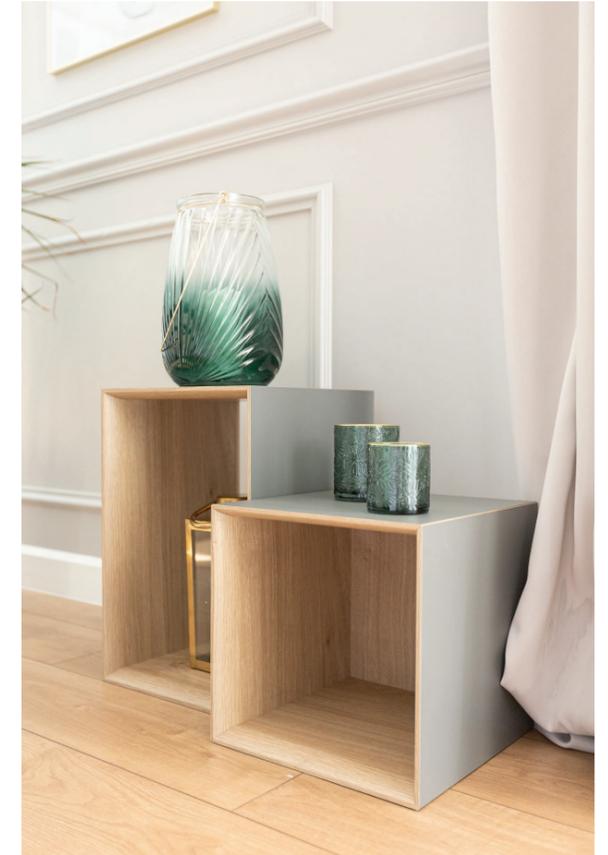

Home office is a part of everyday reality in thousands of small companies and big corporations. The problem is no longer the hardware but the organisation at home. The surroundings have a huge influence on our productivity and quality of our work, so forget about the kitchen table, your child's desk or the sofa in a living room. Make your (and yours family) life easier and create your own workspace tailored to your needs. Here comes the modular system Home Office Select by Melaco.

flick & click™

SEE HOW EASY IT IS

The patented technology of furniture elements production with use of THREESPINE™ click furniture system. Its secret lies in simple mounting. You don't need any screws, fasteners or tools. There are no visible connections or holes.

home office select

MODULAR SOLUTIONS

Home Office Select blocks are great for your creativity. They stand out for their universality, which is missing in standard furniture collections, and exceptional design - the interior of every block has profiled front and back edges in postforming technology.

The modules have no imposed purpose. They can be a part of library in a living room today, and a night table in a bedroom tomorrow. Thanks to them you can build bookshelves, cupboards, shelves, a partition wall, a desk or a coffee table. Set them any way you want and move them whenever you want. That's the idea of Home Office Select.
