# Design Solutions™ 4\_kitchen Decorative Panels

Sustainable development according to the European Green Deal strategy. We care for the natural environment. We implement procedures for recycling the material that will be reprocessed into a product at the manufacturer's. In this way, we also reduce the carbon footprint, in line with the European Union's strategy of climate neutrality known as The Green Deal.

The Desig Solutions™ decorative panels we offer are made to order from FSC®-certified wood-based panels. The Forest Stewardship Council® is an international non-governmental organization promoting the environmentally correct, socially beneficial and economically viable management of the world's forest resources.

# Decorative plates that will transform any kitchen

ARE YOU READY FOR SOMETHING NEW?

Discover innovative Design Solutions™ 4\_kitchen decorative panels will reduce interior finishing costs and shorten redecoration time. Their base is MDF FSC® oard with low formaldehyde emission covered with high quality polymer film. In production, we use a reactive PUR adhesive, which makes the panels stand out for their resistance to moisture and increased temperature. The elements are combined on a 2G click, so you always have a perfect fit. Forget about the classic kitchen backsplash tiles! Time for modern solutions.

## Design in line

WITH LATEST TRENDS

In the Design Solutions™ 4\_kitchen stock program, you will find carefully selected designs inspired by stone, concrete, metal and fabric patterns. We took care of the smallest details - each pattern is distinguished by its unique texture. We have also prepared a program available on individual order.

Design Solutions™ 4\_kitchen decorative panels change the interior design, giving it a unique character. Thanks to the wide range of patterns, you can easily match the panels to the style of the worktop and kitchen furniture. We recommend using Design Solutions™ 4\_kitchen decorative panels in places not exposed to direct water. We also offer panels with increased resistance to moisture on request.
