

Manufacturer of furniture components and furnishings

30lat **/// melaco**
JUBILEUSZ

30 years of experience

For 30 years, we have been supplying customers with high-quality furniture components and interior design materials.

We make products based on the best wood-based boards available, refining the surface using the most up-to-date tools and materials. We hold our own licenses and patents.

Modern technology

Modern technology is a key to our quality. Vacuum pressing, HOT MELT LAMINATION continuous technology, profile wrapping, and thin edge edging are our areas of expertise. We produce ready-made elements and CNC machining of manufactured furniture elements. We create our own designs and fulfill orders in accordance with the criteria laid out by B2B clients.

Products

- high-gloss and supermatt furniture boards
- fronts, tops, 2D and 3D furniture elements
- profile strips
- postforming furniture and bathroom tops
- decorative panels for kitchen, room and bathroom
- furniture elements and furniture frames made using traditional technology and THREEESPINE® technology

Our customers

Production is realized in the MTO system (make to order), in accordance with the customer's specification and as part of the MELACO production program.

Our customers include factories for living room furniture, bedrooms, children's and youth furniture, kitchens, bathroom furniture and office furniture. We also provide a limited selection of goods for modular building and the DIY trade.

Our materials fulfill strict standards

The wood-based boards, polymer films and glues we use in production process come from reputable manufacturers from Poland and other European Union countries.

All raw materials comply with the requirements of the European Union, with special attention to emission standards.

Sustainable development

We care about the environment. We are implementing procedures for recycling material that will be reprocessed into a product at the manufacturer. In this way, we also reduce the carbon footprint, in line with the European Union's strategy of climate neutrality ph. The Green Deal.

The products we offer are manufactured to customer order from FSC® certified wood-based boards.

The Forest Stewardship Council® is an international non-governmental organization that promotes ethical, socially good, and economically viable forest resource management worldwide.

Our brands

We have created unique product lines of boards, postforming panels, fronts and furniture components that differ in design, properties and purpose.

Each product line is distinguished by the way it is finished and the technology used, so both the designer and the furniture maker will find furniture pieces that suit their products and needs. Our components are available in classic as well as modern designs and are used in the entire range of furniture available on the market.
